EXPERIENCE

Upland Software— *Lead Software Engineer*

August 2020 - Present

My role as a software engineer was to architect, build, test and maintain upland applications. I utilized various modern technologies such as React, nodeJs and graphql, docker and AWS while using best practices.

In this role knowledge of AWS and microservice and micro frontends was used inorder to build highly available and configurable multi-tenant SAAS applications.

Freelancer

January 2020 - July 2020

During this period I worked on various applications and websites, offering customized solutions tailored to meet the unique needs and objectives of each client.

Verse LTD - Web Developer

September 20192 - December 2019

Served as a web developer, utilizing modern technologies to create bespoke websites and applications.

Freelancer

September 2018 - September 2019

During this period I worked on various applications and websites, offering customized solutions tailored to meet the unique needs and objectives of each client.
