## EXPERIENCE

### **Pixelacme— Lead Engineer**

Jun 2022 - PRESENT

At Pixelacme, a growing creative agency, my role revolves around collaborating with clients to deliver tailored digital solutions that meet their unique needs and objectives. My responsibilities and contributions include:

- Engaging closely with clients to understand their vision, requirements and goals, ensuring each project is aligned with their strategic objectives.
- Delivering a variety of creative solutions such as bespoke websites, applications and ensuring each project is executed with a high level of professionalism.
- Utilizing a broad spectrum of modern technologies and best practises such as javascript/typescript, React, NodeJS, docker, AWS and more, to ensure each project is developed with up-to-date, reliable and efficient technology.
- Managing each project from start to finish, ensuring deliverables are reached within scope, and within a timely manner.

### **Upland Software— Lead Software Engineer**

August 2020 - Present

My role as a software engineer was to architect, build, test and maintain upland applications. I utilized various modern technologies such as React, nodeJs and graphql, docker and AWS while using best practices.

In this role knowledge of AWS and microservice and micro frontends was used inorder to build highly available and configurable multi-tenant SAAS applications.

### **Freelancer**

January 2020 - July 2020

During this period I worked on various applications and websites, offering customized solutions tailored to meet the unique needs and objectives of each client.
